

Orchid Electronics Amp Interface

- This is used to connect a recording system to a guitar amplifier - often known as re-amping, to enable re-recording of the guitar part, to capture the sound of the instrument amplifier, speakers and room
- Balanced input on Neutrik Combi XLR/jack socket, unbalanced jacks can also be plugged in
- Earth lift facility – miniature toggle switch
- Polarity reverse facility (sometimes called Phase reverse) - miniature toggle switch
- Volume control to set level into the guitar amplifier
- Output jack socket for connection to amplifier
- Housed in strong steel case fitted with rubber non slip pad
- Convenient floor mounting 105 X 82 X 46mm
